“Psychiatric Issues for the Non-Psychiatric Nurse: Identifying Emotional Disorders in Primary Care”

Presented By Texas Nurses Association, District Four

**Friday, February 24, 2012
7:30 AM to 4:00 PM**

**Texas Health Resources University
(Old TWU Auditorium)
8200 Walnut Hill Lane, Dallas, Texas 75231**

Following completion of the activity the learner will:

1) Discuss the prevalence for psychiatric disorders in the general population; 2) Identify risk factors for psychiatric illnesses frequently seen in primary care; 3) Discuss assessment parameters for identifying psychiatric conditions in the primary care client; 4) Discuss signs and symptoms of emotional disorders that may be exhibited in the primary care; 5) Outline key points in performing a suicide assessment in the client who complains of symptoms of setting; 6) Identify adverse drug reactions that are frequently seen in commonly prescribed psychotropic medications; 7) Discuss nursing interventions for managing the psychiatric client in primary care; 8) Identify psychiatric issues in pregnancy; and 9) Identify parameters for referring the client with psychiatric symptoms to a mental health specialist.

Fees Which Include Continental Breakfast and Lunch:

**\$45 TNA Members
\$65 Non-Members**

Approved for 6.0 Contact Hours
